

Jamberoo FutureCare solar power Project - 2009

Would you like to produce your own electricity?

Get grid-connect solar on your roof for between \$3000-3500!!

If you would like to be part of a Kiama local area bulk solar PV purchase, or at the very least find out more, let us know by Wednesday, 4th February 09 or ASAP, via email at; jamberoofuturecare@gmail.com or call Sarah on 4236 0286.

The more people we have, the better the deal we all get, so tell your friends about this great opportunity!

The price above assumes your eligibility for the federal government's \$8000 rebate ([click here](#)) and the suitability of your house. To obtain the federal government rebate your household taxable family income must be less than \$100,000.

The \$8000 rebate is due to end 30th June this year!!

(More information on next page)

Dear Supporter

Jamberoo FutureCare is currently enquiring with several Australian companies to get a bulk installation of solar photovoltaic (PV) power. The deal we anticipate will be cheaper than market prices, due to the economies of scale.

At this stage, it is likely that the price to each resident will vary somewhere between \$3000-3500 for a 1kW system, but hopefully closer to the bottom end of that range depending on the number of households. The full retail value of a 1kw system is at present \$12000 - \$13000. A 1kW system would typically generate about 1/4 to 1/3 of the average household's electricity, but it could be more if you implement energy efficiency measures throughout your home. As you might expect, the more installations we get, the cheaper it is for everyone.

A new REC's discount system will be introduced from July 1st this will not be subject to a means test, however it will not be as significant as the current rebate. If you are not eligible for the existing rebate but would be interested in buying after June 30th please register your interest with us.

It is no secret that electricity prices will be going up significantly in the coming few years, so now is the time to go solar, particularly if you have a north or west facing roof

With an indication of the interest amongst the community we will be able to negotiate a better discount.

When we have secured a provider an information night will be held for interested parties to find out more. Details of this event will be sent to the email address you supply.

Note: Jamberoo FutureCare will not under any circumstances forward your details to any external organisation or business without your explicit written approval (by email).

Kind Regards,

Jamberoo FutureCare
